Course no. 190873

*For complete registration information and a registration form, please see the reverse side of this invitation.*

Dr. Scott MacLean

#### Course overview

Dr. MacLean will discuss a number of different implant-related topics. Dr. MacLean will review surgical and restorative techniques, including implant design, planning and tips, seating the abutment, immediate placement and temporization, and screw- and cement-retained restorations.

#### Learning objectives

- Understand how to improve the implant numbers in your office based on an ethical approach to treatment planning.
- Be able to apply immediate implant placement and temporization with amazing esthetic results while maintaining a 99% survival rate.
- Understand the new angulated screw channel technology.
- Become familiar with NobelClinician® Software planning. Bring your iPad® for a unique treatment planning experience utilizing NobelClinician®. See how easy this technology has become. Share files between doctors, technicians, patients, and manufacturers!
- Become familiar with custom impression copings – how to make them and why you should do this.
- Identify common problems when seating implant crowns and how to make this problem go away.

**This course is intended for clinicians interested in treatment planning, temporizing, and restoring dental implants.**

### About the speaker

#### Scott MacLean, DDS

Dr. Scott MacLean is currently a part-time clinical professor at the Dalhousie Dental Clinic in the "implant elective." He practices general dentistry in Halifax, Nova Scotia, with a large component of his practice focused on implant and esthetic dentistry. He was recently celebrated as number one out of 60 participants in an international speakers training program and has published articles internationally on implant dentistry.

Dr. MacLean is a member of the International Congress of Oral Implantologists (ICOI), Canadian Academy of Restorative Prosthodontics (CARDP), the Canadian Academy for Esthetic Dentistry (CAED), and the American Academy of Cosmetic Dentistry (AACD). He is a fellow of the Academy of Dentistry International, the Pierre Fauchard Academy, and the American College of Dentists.

Dr. MacLean started working with the NobelActive® implant prior to its release in North America and is currently an evaluator for new products coming into the implant market.
